INFINITY LUBE

FUEL OX® INFINITY LUBE™ SUPER SPRAY

*ALL PURPOSE METAL SPRAY THAT CLEANS,
LUBRICATES, CONDITIONS, DEGREASES, AND
PROTECTS AT A MICRON LEVEL*

DESCRIPTION

Fuel Ox® Infinity Lube™ Penetrating Lubricant is an advanced lubricant that cleans, conditions and provides a lubricating film to improve and protect metal surfaces. This advanced formula spray lubricant is suited for all external mechanical systems and metal surfaces that need a lubricant, cleaner, degreaser, or surface protectant. Fuel Ox® Infinity Lube™ Penetrating Lubricant's anti-friction anti-corrosion formula makes it one of the most revolutionary high-performance spray lubricants. Fuel Ox® Infinity Lube™ Penetrating Lubricant contains a mixture of bio-based elements and plant based essential oils and is infused with our exclusive HDI-2500 concentrate technology. This technology fortifies the Fuel Ox® Infinity Lube™ Penetrating Lubricant to the highest levels of superior lubrication and corrosion resistant performance.

APPLICATIONS

Use on all exposed machinery and metal components to reduce friction, clean, degrease, protect, or free rusted or corroded nuts, bolts, and metal parts. Forklifts, chains, cables, moving metal parts, metal tracks, etc.

ADVANTAGES

SUSTAINABILITY. This spray will increase the longevity of all treated equipment while lowering the energy required for the machinery to operate. Lessens wear and tear of all treated parts, resulting in fewer replacement parts, less maintenance, and lower operating costs. These advantages present returns on investments far beyond any other friction reducer currently available.

MATERIALS COMPATIBILITY

Recommended for ferrous and nonferrous metals

BENEFITS

- **Loosens and releases rusted, stuck, or frozen metal parts**
- **Drastically reduces friction wear and operating temperature**
- **Cleans & degreases**
- **Removes carbon and friction points, flattens, smooths and strengthens the metal, and binds it with a protective lubricating film. Infinity Lube™ creates a charge between the two treated metals that cause them to repel each other. Similar to two magnets with the same polarity, they float above each other, thus drag, friction, wear, and operating temperatures are all reduced**
- **Increases operating efficiency of all treated equipment**
- **Increases operating life of lubricated equipment**
- **Conditions, smooths, lubricates and hardens metal on a micron level**
- **Lowers maintenance and operating costs**
- **Anti-corrosive (impedes corrosion from rust, oxidation, dirt, etc.)**
- **Exceptional performance under extreme pressure**
- **Water-resistant**

AVAILABLE SIZES

1 can (14 oz)
1 case (12 can)
5 gallon pail
55 gallon drum

**BIOBASED & TOXIN FREE
MADE WITH PLANT BASED ESSENTIAL OILS
SHAKE WELL**
